

OCR Functional Mathematics: Student Book Entry Level 3 & levels 1 & 2

Patmore, MR Mark Patmore

Written by experienced authors and examiners working closely with OCR, this Students Book supports the study of OCR Functional Skills Mathematics. There is comprehensive coverage of Levels 1 and 2, and whilst Entry Level 3 is not part of the final assessment, guidance for centres on how to support the progression of students working at Entry Level 3 is provided together with additional resources. The wide range of contemporary examples motivate students to apply and transfer mathematical skills and knowledge in their daily lives. Scenarios include media, fundraising for charity, transport, and healthy eating. Other resources include: Teachers Resource with learner profiles at each level, guidance on new functional and problem-solving questions, and answers to the exercises in the Students Book.
