

Ochoco Project and Crooked River Investigations (Classic Reprint)

John T Whistler

Excerpt from Ochoco Project and Crooked River Investigations In a similar manner it is shown that a head of not less than 200 feet must be developed before Crooked River storage, at its estimated cost, will be of economic value for sites above the mouths of Warm spring and Metolius Rivers. There being no feasible power sites on Crooked River itself of sufficient magnitude to justify storage, it may therefore be said that Crooked River offers no attractions as a power stream either by itself or in connection with Deschutes River.
