The Oculus Rift is a virtual reality device that can be worn on the head of an individual giving them a feeling of being in a totally different world. The project began back in 2012 and is used with games to create a three-dimensional world in which to play. It was released in 2014 and works with most games currently on the market. The Oculus Rift includes a light headset that makes moving around easy as users experience this completely interactive virtual world.
